Art Unit: 3725

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a planer and depth measuring means, classified in class 144, subclass 130.
- II. Claims 15-17, drawn to a planer and switch therefor, classified in class 144, subclass 117.1.
- III. Claims 18 and 19, drawn to a planer with leveling indicator, classified in class 144, subclass 114.1.
- IV. Claims 20-41, drawn to a planer with a depth stop mechanism, classified in class 144, subclass 130.
- V. Claims 42-51, drawn to a dust removal assembly, classified in class 144, subclass 252.1.

The inventions are distinct, each from the other because:

Inventions I-IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each respective invention is capable of being used independently and separately without the need for the presence of any other subcombination component. For example, invention V is separately useable to remove debris without the need for any of subcombinations I-IV. The same is true for subcombination I-IV relative to each other and subcombination V. Each stands on its own has separate utility such as . See MPEP § 806.05(d).

Art Unit: 3725

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to W. Donald Bray at telephone number 703-308-1871.
